# TALENTS IN ACTION

This activity's purpose is to help you and your clients gain a greater understanding of their individual talents within the context of their Signature Themes. It is designed to highlight areas of uniqueness and help your clients visualize their talents in action. First, have your client read the descriptions of each of his or her five Signature Themes and then highlight the parts that best describe him or her. Then, ask your client to describe a recent situation in which he or she applied talents from each theme. As your client relates these stories, use the space below to record your observations.
